## Toyota Tsusho Systems and Moro Technology Corporation Announce Strategic Capital Alliance to Enhance Global IT Services for Toyota Group and Japanese Multinational Corporations

Nagoya, Japan 17.06.25 – [Toyota Tsusho Systems](#) (HQ: Aichi prefecture, Nagoya, Representative Director and President: Hirotooshi Watanabe, hereafter TTS) has made a strategic investment acquiring a 35% share in [Moro Technology Corporation](#) (HQ: Aichi prefecture, Nagoya, Representative Director and CEO: Marios Papanikolopoulos, hereafter MTC), a subsidiary of MORO GLOBAL BV. This capital alliance, concluded in April 2025, merges the strengths of TTS, which provides global support primarily focused on the automotive industry, with MTC's digital technology engineering capabilities and expertise. Building on this synergy, the partnership will expand its presence in the market of Japanese businesses operating globally.

This strategic investment fuels growth for both organizations by strengthening their foundation to deliver enhanced services and better respond to clients' needs through:

- **Accelerated Global Expansion & Market Reach:** MTC is set to accelerate its business expansion into the Americas and Africa, in addition to its existing European operations. Leveraging TTS's extensive global reach and wealth of experience, MTC will proactively expand its worldwide in-house engineering team. By harnessing MTC's digital expertise and customer-centric IT solutions, we will jointly contribute to the global expansion, digital transformation (DX), and AI development initiatives of Japanese corporations, including the Toyota Group.
- **Enhanced Operational Support through Specialized Engineering Expertise:** MTC's service model and highly skilled digital talent, delivered with TTS's global network, will enable us to provide rapid support for overseas projects.
- **Expanded Long-Term Strategic Partnership:** This investment further evolves the collaborative relationship between TTS and MTC, which started in 2019. By elevating our shared objectives more than ever before, we solidify our position as a trusted technology partner dedicated to delivering even higher quality services to Japanese global corporations.

Toyota Tsusho Systems President Hirotooshi Watanabe, said, “Toyota Tsusho Systems will utilize Moro Technology Corporation's engineering expertise and advanced capabilities to extend TTS's reach to support the Toyota Group's overseas operations more comprehensively than ever before. Through the enhanced support coverage resulting from this capital participation, we are confident in our strengthened ability to offer our proven expertise developed over many years to Japanese companies operating globally. We look forward to further developing our collaboration with MTC and working to resolve the IT support challenges our customers face at their global operations.”

Moro Technology Corporation CEO Marios Papanikolopoulos, stated, “Joining the Toyota Tsusho family through this strategic partnership with Toyota Tsusho Systems is a significant milestone for MTC, reflecting confidence in our vision and team. This mutually beneficial alliance enhances our ability to better serve our clients, especially the Toyota Group, and strengthens our capacity as a global technology partner for Japanese businesses, leveraging
